Project Management Training & PMP Certification Exam Preparation

Pre-requisite :People who earn the first degree in university

Duration: 45 hours

Fees: JD 650

Introduction

A Project Management Professional (PMP) is internationally recognized as the best and brightest in the field. Having a PMP certification proves that you have an advanced level of experience and project management knowledge. Thus, you distinguish yourself as a sought- after professional in this tight labor market.

Objectives

- This course is unique among other courses, as it is focused on construction projects. It provides you with a strong knowledge of best practices in construction project management according to the latest standards, including the PMI's PMBOK® Guide 4th edition, and the Construction Extension to the PMBOK® Guide 3rd edition. This is necessary to ensure that your projects are completed on time, within budget, and meet the customers' expectations as well as quality, safety, and environmental requirements.
- It shows you how to enhance your interpersonal (soft) skills, which are essential for successful project management.
- It teaches you how to apply for the exam, how to prepare for it, and how to pass and attain the highly accredited PMP certification.
- It provides you with case studies, 1000+ Q & A, and Excel based PMP exam simulation.

Brief Description

Built into the course are the processes necessary to start and manage a project from beginning to end. This covers the five Process Groups of project management outlined in the PMBOK® Guide, including Initiation, Planning, Executing, Monitoring & Controlling, and Closing. It also focuses on Professional and Social Responsibility as well as Code of professional Conduct.

The course covers the nine Knowledge Areas outlined in the PMBOK® Guide 4th edition

comprising:

- Project Integration Management
- Project Scope Management
- Project Time Management
- Project Cost Management
- Project Quality Management
- Project Human Resources Management
- Project Communication Management
- Project Risk Management
- Project Procurement Management

Furthermore, it covers the following four additional Knowledge Areas specific to construction projects, as outlined in the Construction Extension to the PMBOK® Guide 3rd edition:

- Project Safety Management
- Project Environmental Management
- Project Financial Management
- Project Claim Management

Who should attend?

This course is targeted for various managers and team members involved in the construction industry who are looking for effective ways to implement proper project management methodologies on their projects. These include Project Managers, Engineers, Human Resources Managers, IT Managers, Financial Managers, Contractors, and Tradespersons.
